

## M:7 Agency Photographer Videographer

### Job Summary

In this role the Multimedia Designer will creatively use design fundamentals and digital media to support branding and communication needs for the company and its subsidiaries. The individual will be responsible for capturing photos, videos, and producing other digital content for use on social media, websites and across all internal and external communications channels. This position requires a mix of creative design challenges and production duties along with the ability to work quickly and effectively in a collaborative environment. The ideal candidate must be a highly motivated self-starter, who is detail oriented with great design instincts. Communication, thoroughness, and attention to detail are key to success in this position.

### Primary Responsibilities

- Ability to create solid shotlists and storyboards.
- Produce engaging content for various multimedia outlets including website, video, social media and more.
- Produce video & photo projects from concept to completion in a fast-paced environment. Make creative decisions about audio, video and graphics to meet project objectives.
- Perform post-production tasks which include reviewing and logging footage, final editing and archiving.
- Manage set up and break down of lights, cameras and sound equipment for on location video and photo shoots.
- Maintain all audio-visual equipment. Make recommendations for equipment upgrades or replacements.

### Basic Qualifications

- Bachelor's Degree in multimedia design, digital media or a similar field along with 1-2 years of experience.
- Extensive experience in Adobe Premiere, After Effects & Lightroom.
- Ability to work within brand guidelines while finding creative ways to apply new technology and ideas.
- A strong eye for composition, color and light.
- Proficiency in creating and editing photos and videos, translating multimedia projects for web use and social media channels.
- Strong understanding of branding identity, aesthetic, advertising, and multimedia design.
- Understanding of the Mac operating system.

- Understanding of Google suite and its products.
- Knowledge of production elements including lighting, audio, and camera setup.
- Excellent visual, written, and verbal communication skills.
- Ability to work independently while also collaborating in a team dynamic, and under close direction.
- Detail oriented and organized with the ability to manage multiple concurrent project demands, prioritize tasks, communicate progress, and meet deadlines
- For consideration a portfolio of current visuals and work examples must be provided.

**Desired but not required**

- Understanding & experience with operating cinematic quality cameras (RED etc.)
- Experience with capturing drone footage
- Completed video projects that required heavy focus on editing
- Have examples of photoshoots where specific lighting / look was requested
- Experience with Telephoto lenses & Ronin Gimbal
- Photo and video experience where the subject was in rapid motion.
